

Senior security leadership, *backed by a platform that shows the board where you stand.*

An experienced virtual CISO runs your governance, risk and compliance programme. iCISO, our own GRC platform, turns it into one living picture of risk, controls, delivery and budget, ready for the boardroom.

WHY IT WORKS

From chaos, *order.*

Spreadsheets, audits, questionnaires and frameworks pull security in different directions. We bring them into one place, so every finding has an owner, a cost and a deadline, and the board sees progress rather than a slide deck.

- ✓ **Deploy in days, not weeks.** A Quick Assessment gives a scored baseline on day one.
- ✓ **A fraction of a full-time CISO.** Senior leadership without the salary, recruitment or retention risk.
- ✓ **Board-ready, every month.** PDF, Word and PowerPoint reports generated straight from live data.

The iCISO dashboard. Posture, risks, gaps and progress at a glance.

THE ICISO PLATFORM

Six connected views, *one source of truth.*

Risk & Assessment 1 Quick Assessment, Enterprise Risk, Risk and GAP Registers on one lifecycle.	Scope 2 Business units, security domains, assets and vendors.	Delivery 3 Findings become projects and tasks with owners, dates and budgets.
Response & Continuity 4 Incidents, operational resilience and response capability.	Assurance 5 Compliance by framework, architecture, benchmarks and training.	Intelligence 6 Threat intelligence filtered to your sector and geography, plus AI insights.
9+ native compliance standards, crosswalked	140 question vendor assessment kit	80 source threat intelligence register
		1 platform, multi-tenant from day one

What your board *actually* sees.

The Board Report. RAG-rated across ten areas, with a ranked budget breakdown, unplanned "budget needed now" requests, and TLP:RED handling. Exports to PDF, Word and PowerPoint.

Quick Assessment. Six pillars, a scored baseline and the weakest areas first.

Risk and GAP Registers. Every finding owned, costed and due.

— HOW WE WORK

01

Assess

Questionnaires and scans produce a gap analysis against industry benchmarks.

02

Plan

Tailored policies and a prioritised, costed remediation plan.

03

Manage

We run the programme: monitoring, scanning, adjusting as you change.

04

Report

Posture, trends, gaps and budget, in language the board understands.

— FRAMEWORKS

ISO 27001

NIST CSF 2.0

UK NCSC CAF

EU NIS2

Saudi ECC-2

OTCC-1

SCF

GDPR

— SECURITY & TRUST

- ✓ **MFA and tenant isolation** as standard.
- ✓ **Encrypted per-tenant export**: your data is never locked in.
- ✓ **TLP-marked board reporting** for sensitive findings.

Bring your security programme *into order*.

A 30-minute briefing: where you stand, what matters most, and how a vCISO with iCISO would get you there. iCISO is also available on its own for in-house teams and consultancies.
